

## Video Submission

This does not need to be professionally produced. You can use whatever device you like to make it on.

A few suggestions:

- It is preferable that the device, especially on smartphones, tablets etc, is set up to record on the highest quality setting.
- Avoid having light behind you i.e., don't be in front of a window.
- Landscape orientations is preferable, but not essential.
- The sound is more important than the visual so make sure you are in a suitable room.
- Introduce each piece you are about to perform.

Sending:

The file size will be too large to send by email etc.
